## PUBLIC NOTICE: SEASONAL VEHICLE WEIGHT RESTRICTIONS

Issue Date: February 2021

This notice is to remind the public and the trucking industry that seasonal weightload restrictions will be imposed soon by the Department on its highway system for all vehicles over 10,000# GVW. These annual weight restrictions are intended to reduce roadway damage caused by heavy vehicles traveling on highways weakened during spring thawing conditions. The weight restrictions are stated as a percentage of legal allowable weight and shall be applied to the maximum axle loading in accordance with 17 AAC 25.013(e).

These annual restrictions are very dependent upon weather, local soil conditions, and frost depth, but usually occur between late February and May each year for Southeast Alaska, Kodiak Island, and the Alaska Peninsula. Since these limitations may reduce the allowable gross vehicle weight by as much as 50%, it would be advisable to transport as much freight as possible prior to the above dates. All State routes may be subject to seasonal weight restrictions.

When imposed, or modified, these restrictions will be posted on the DOT&PF Division of Measurement Standards and Commercial Vehicle Enforcement webpage.

This can be found at: <http://www.dot.state.ak.us/mscve/main.cfm>

- Under Commercial Vehicle tab at the top of the page, click Weight Restrictions.
- Choose the latest Southcoast Region listing to view the current version of our posted seasonal weight restriction notices.

The Department of Public Safety and MSCVE officers will be enforcing these restrictions.
