Print sells... Day after day

One of print's great advantages is that it **lives far longer** than digital. Marketing experts say that print vehicles like catalogs and magazines have shelf lives of two weeks or more.

And print generates many impressions, not only from the initial recipient but also from pass-along readership within the household or office.

Readers also tend to give print their undivided attention. They're not multitasking like they do in a digital environment. That makes print a better platform for establishing brand worthiness and value.

Print Has Other Benefits Digital Doesn't

And in a strange twist, the proliferation of digital gives print a unique new power. Print is special and rises above the digital racket. It can complement your existing digital campaigns and persuade consumers to interact with your brand online.
